An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Grover on 2 March 2006. Applicant agreed to amend claims 21 and 27 to set forth that the first and second spacings correspond to particular sensor types. Such a limitation is already set forth in independent claim 33.

The application has been amended as follows:

Non-elected claims 1 - 20 and 37 - 39 were cancelled.

Claim 21 was amended as follows:

21. A sensor circuit comprising:

a circuit substrate;

a pair of pads disposed on an optical portion of said circuit substrate;

a plurality of pinouts disposed on a connector portion of said circuit substrate;

and

a plurality of conductive paths providing electrical communication between said pads and said pinouts,

said pads configured to mechanically mount a corresponding pair of optical components to said circuit substrate and to electrically connect said components to said conductive paths,

Art Unit: 3735

at least one of said pads adapted to mount one of said components at either a first spacing or a second spacing from the other one of said components,

said first and second spacings corresponding to particular sensor types, and

said second spacing being greater than said first spacing by a predetermined amount.

Claim 27 was amended as follows:

27. A sensor circuit comprising:

a flexible circuit substrate;

a first pad disposed on said substrate and configured to mount a detector; and

a second pad disposed on said substrate and configured to mount an emitter,

at least one of said first pad and said second pad adapted so that a detector-emitter spacing is a first distance or a second distance depending on the placement of at least one of said detector and said emitter,

said first distance and said second distance predetermined and corresponding to  
[so as to accommodate] particular sensor types.
